

Can you help provide clean water to the villagers of Umoja in northwest Kenya?

Alfred Juma Mangwa (Pastor of the Church of Christ of Everlasting Gospel in Umoja) needs your help! A clean-water system for this needy village has been started with the delivery in September of a “Clean Water for the World” water-purification device that uses a high-intensity ultraviolet light to kill all bacteria in unclean water. To complete this project, a total of \$1750 in donations is needed to pay for:

- A 1000 liter/hour water-pump (made by Honda/Japan) and 40 meters of 3-inch water-pipe to bring water from a nearby river to the water-purification device
- 2 electrical circuits to power the water-pump and water-purification device
- A 2000-liter plastic water-tank to hold unclean water from the river
- A 2000-liter plastic water-tank to hold sanitized clean water
- Transportation of the water-pump and water-tanks from Kitale to Umoja

To make a donation to help complete this clean-water project, contact:
